

## QuietRock QR-525 & QR-530 Features, Attributes & Benefits

Noted below are benefits as commented from architect's, engineer's, designer's and home owner's perspectives.

**This product is *truly* AMAZING.**

1. Quicker time to market for the property, achieving revenues quicker
2. Less liability for building owners as trades vacate earlier as less work to do
3. Less tax expense as building requires smaller real estate footprint to build same plans
4. On fixed land footprint create higher building square footage, yielding higher property revenues
5. Reclaim dead space by removing double or staggered stud walls, increasing property values
6. Product cannot be short-circuited
7. Leave things "as they are" in Heritage and Century homes by applying wall board directly to lathe and plaster
8. Over 400% quieter than standard drywall
9. Only retrofit product available to meet and exceed code
10. Ten time more effective than resilient channel
11. Achieve STC50 code automatically with a single stud assembly
12. Lowest installed cost per square foot
13. Saves square footage, maintaining property values accordingly in retrofit environments
14. Reduce building footprint and save on land costs, resulting in lower monthly payments
15. For every dollar invested, receive that plus more on the sale of your property as a "QuietHome" or having "QuietRooms"
16. One sheet equals 8 sheets of regular drywall, acoustically
17. Quicker time to revenue as property construction closes faster
18. Full compliment of 12 products for a "complete system" solution
19. Hangs like regular drywall and requires no special training to handle
20. Less material used while achieving a higher STC value compared to other solutions

**Those are to name but a few benefits of the QR-525 and OR-530. We have other products even more amazing!!!**
